F

E

G

H

I

J

3. Read the article and match the titles of the paragraphs:

- A. cut down on salt
- B. danger of saturated fat
- C. five-a-day
- D. drink a lot of water
- E. cut down on sugar

HOW TO STAY HEALTHY

1. _____

People who eat a lot of fruit and vegetables are less likely to have heart problems. You should eat at least five portions of fruit and vegetables a day. One portion is e.g. a banana, an apple, one slice of melon or pineapple or two plums. Remember that potatoes are not included on that list.

2. _____

Eating too much salt can raise your blood pressure. And people with high blood pressure are three times more likely to develop heart disease or have a stroke than people with normal blood pressure. Three-quarters (75%) of the salt we eat is already in the food we buy, such as breakfast cereals, soups, sauces and ready meals. So you could easily be eating too much salt without realising it.

3. _____

Having too much saturated fat can cause heart disease. Products that contain large amounts of saturated fats are meat pies, cheese, butter, lard, cream, cakes. You should replace butter and lard with vegetable oils, which don't contain saturated fat.

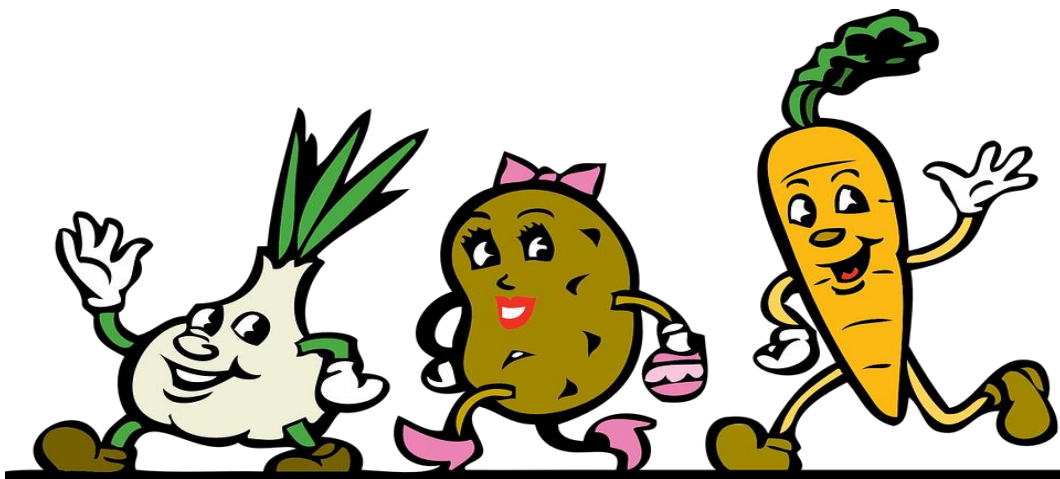

4. _____

Having sugary foods and drinks too often can cause tooth decay. Cutting down on sugar will help you control your weight. Sugar is added to many types of food e.g. fizzy drinks, juices, sweets, biscuits, cakes, ice cream

5. _____

We should be drinking about 6 to 8 glasses of water every day and even more when the weather is warm.

Don't drink too much coffee or tea as they can dehydrate you.

4. Look at the text again, read the sentences and decide whether they are true or false.

	TRUE	FALSE
1. Eating vegetables and fruit is good for your heart	<input type="checkbox"/>	<input type="checkbox"/>
2. One melon is a portion of fruit	<input type="checkbox"/>	<input type="checkbox"/>
3. Potatoes can be eaten as part of your five-a-day	<input type="checkbox"/>	<input type="checkbox"/>
